

MegaPoke

Instillation Guide

IMPORTANT: Please follow all steps in this installation guide in order to make this plugin work smoothly. If you need any assistance, please email install@phpfoxlabs.com

I. SYSTEM REQUIREMENT:

1. phpFox >= 2.0

II. INSTALLATION:

1. Upload "upload" folder to phpFox root directory.
2. Go to adminCP > extensions > product > import product , install "phpfoxLABS - MegaPoke" package.
3. Go to the Drop Down Menu in Admin Page: Modules > MegaPoke > Poke Types
4. Enter as many Poke Types as you want.
5. Go to a user Profile (other than yours) to see if MegaPoke is there, if so happy Poking. If not something went wrong, go back over the steps. If you still can not fix the problem shoot us an email: install@phpfoxlabs.com

Extra stuff you can do:

1. You can edit all the MegaPoke Phrases in your Phrase Manager.
2. You can also set which user groups get access to MegaPoke.

Thats all! Thanks for being a customer, if you have questions please email install@phpfoxlabs.com
